

Hello,

My name is Rose Daudi, I am one among the form three students who have just received the National Examination results. I really thank God for the wonderful results that we have just received, although that is not really what I expected, because I believe that I would have done better than that, and that has happened because of my own laziness and I did not put more effort on my studies so as to perform the grades that I expected. But I still thank God for what was possible.

The ~~really~~ struggle subject that I really struggle with is Maths, but I believe if that if I work hard I can do better and I don't really struggle in the other subjects but is just that, I have to work hard and to put more effort on these subjects and through working hard I can perform well. And I really don't have a good reason to why I have got F in Maths and Physics but I am <sup>sure</sup> that was <sup>my</sup> personal laziness, but if I had worked really hard I would have performed well, especially in physics, because I didn't expect to get F in physics and I believe that I can perform physics very well.

Apart from that I am very grateful ~~to~~ <sup>to</sup> the Bethany Supporters for their prayers, and everything they do to make Bethany succeed, and the Bethany leadership, Miss Paula, Brother Muter, Miss Buyika and all the careworkers for the hard work that they do and God bless the workers of their hands. But above all very great thanks to God because without him nothing is possible and very great thanks again for making Bethany possible.

THANK

YOU;
