## STANDARD FIVE TERMINAL REPORT JUNE 2021

### CLASS TEACHER: MANHYABULUBA MATOGOLO NKILJIWA

Dear Mrs.Zephaniah I am pleased to present to you a report of year five about the terminal of academic year of 2021. First of all I am proudly passing my greetings to you Mrs.Zephaniah that you are fine under God's love. After my greeting, I would to take this chance to present to you my terminal report of May 2021 in standard five at Bethany pre and primary school. This report is explaining the teaching and learning process, behaviour, suggestions and thankfulness. By explaining each of them, I would like to start with:

#### THE QUALITY OF TEACHING AND LEARNING

The academic performance of class five is changing positively day to day; this is proved in their internal examinations. For instance, the results of the monthly test of April, the class average was 29"C" and the results of this terminal examinations of may 2021 the class average is 31"B". Apart from that achievements there some pupils who are still struggling in their studies especially in mathematics subject,these pupils are Doto Masalu Mashine,Leticia Kimahi Shile,Mariga Robert Mshila,Olivia Khija Katanile, Warioba Khija Katanile, Neema Nzenzule Lucas,Mwita Mwita Chacha,Nyamiti Sosoni Julias and Rehama Sosoni Julias. These pupils needs more supervision.All in all I'm putting more efforts on understanding pupil's abilities by helping them individually and in generally also I'm always given them guide and counselling.This helping me to improve the academic performance to my pupils positively.

#### I'M FILLING HAPPY TO BE A CLASS TEACHER OF STANDARD FIVE WITH MY PUPILS.

Despite of having positive changes in year five this term,also there are some areas pupils are struggling.For instance,all year five pupils are struggling in spelling and determination of needs in different questions especially in mathematics vocabulary and words.Allways pupils are falling to solve word problems of mathematics.Although they are getting different helps from teachers and their fellow pupils as the results they are lowering the general averages of the class in the examinations.

#### BEHAVIOUR

The behaviour of year five is good because pupils they are able to follow the directions given by teachers.Also pupils of year five are cooperating themselves even if the teachers are not around in the class. Despite of having good behaviour in my class, also they need more counseling, guidance and advices because they are human being who can forget, also pupils are cooperating well themselves in academic matters for instance during group discussions and different word problems in academic issue. Generally the behaviour of year five is good, also all teachers are welcomed to correct my pupil when mistakes/problems are observed.

#### SUGGESTIONS

As a class teacher I suggest the followings;

- Next term teachers who are teaching in class five should do revision of the past content in form of questions especially contents of year four, year three and year five. This Will help pupils to be competent in all contents thought and will help them to perform well in the exams.

- However those pupils who are struggling in mathematics will be given more simple mathematic questions which will help them to master simple concepts.

- Not only that but also teachers should continue providing more subjective questions in form of exercise, home work, quiz and tests .This will help them to be perfect and to make them to be attention all the time.

All in all year five pupils are good in all spheres including academically. But we need to have positive altitude to Ward forward the class by encouraging them frequently. I'm sure in god everything is possible and God will be with us and they will do better than now in their studies.

#### THANKFULNESS

Finally I would like to thanks Mrs:Zephaniah and her academic committee for working hard with us teachers through providing teaching and learning resources where is possible. This helps both class teachers, subject teachers and pupils to improve academic performance and quality of teaching and learning process.

Yours in christian

MR. MANHYABULUBA MATOGOLO NKILJIWA

Standard five class teacher.
